Hon Yen Yang

Software Engineering & AI Undergraduate | Full-Stack & AI Applications
honyenyang22@gmail.com | Subang Jaya, Selangor | linkedin.com/in/hon-yen-yang | github.com/hnynyng

PROFESSIONAL SUMMARY

Software Engineering and AI undergraduate at Sunway University (graduating September 2027, CGPA 3.49, Dean's List) seeking a software engineering internship from January to April 2027. Builds reliable full-stack web and AI apps, including a sales-tracking app from Codex Hackathon Malaysia (one of the top 150 finalised builders) and a secured AI chatbot. Vice President of a 300+ member university club.

EDUCATION

Bachelor of Software Engineering and AI | Sunway University, Kuala Lumpur | Expected September 2027
- CGPA 3.49 / 4.00, Dean's List for multiple semesters. Coursework: Data Structures and Algorithms, Java OOP, Databases (SQL, Oracle APEX), Networking, Software Testing, Computer Security.
- Final year project (planned): keeping AI agents from forgetting user rules or auto-deleting data in long sessions.

Monash University Foundation Year (MUFY) | Sunway College, Kuala Lumpur | June 2024 | 72.75%

Sijil Pelajaran Malaysia (SPM) | SMK Subang Utama, Selangor | 2022

PROJECTS

WarungAI: Sales, Expense & Profit Tracking App | Codex Hackathon Malaysia, top 150 builders (Developer) | github.com/clemedev/WarungAI
- Built stock tracking that updates with every sale, blocks overselling, restores stock on undo, and warns the owner when products run low.
- Extended the receipt scanner to read item quantities across 8 receipt layouts (up from 4), growing automated tests from 16 to 23.
- Added a one-tap Rush mode, an end-of-day summary with WhatsApp sharing and Undo Sale, weekly insights and three-language support.

ClementGPT: AI Chat Application | University team project | github.com/clemedev/ClementGPT
- Turned a front-end-only demo into a Gemini AI chatbot with a Python (Flask) backend, saved chat history, multiple chats and file uploads.
- Closed a security hole where typed text could run as code, and added rate limiting, input and file checks and protected cookies.
- Added automated security scans (Bandit, pip-audit) on every push and a Gunicorn production setup, using AI-assisted development.

Client Promotional Website | Freelance | starlight-events.vercel.app
- Built a one-page portfolio site for an events business with a filterable gallery and WhatsApp contact, using AI-assisted development.
- After he used it at his own event, he reported more enquiries (about 2 to about 4 events a month, my estimate).

SKILLS

Programming languages: Python, JavaScript, Java, SQL, HTML/CSS
Web and data: React.js (Vite), Flask, RESTful APIs, Supabase/PostgreSQL, Oracle APEX
Testing, security and tools: Vitest (17 tests written), ISTQB-style test design, Git/GitHub, Docker, Bandit, pip-audit, rate limiting, input validation, XSS prevention, AWS EC2 (introductory)
AI / LLM: Gemini API, OCR, AI-assisted development (Claude)
Soft skills: leadership, delegation, mentoring, teamwork, communication. Spoken languages: Chinese, Malay, English

EXPERIENCE

Vice President, Sunway Pool Club | Sunway University | June 2025 - Present (VP since July 2026)
- Co-lead a 6-person committee for a 300+ member club, delegating proposals and sponsor outreach, following up until done and mentoring new members.
- Proposed bundle pricing and won committee agreement with a full cost breakdown, raising session income relative to costs by about 40% and attendance from about 6 to 9 people per session.
- Restructured the club's finance reports with relational databases so monthly reports spot missing funds.
- Cut a tournament budget to about RM5k and its subsidy request from RM8k to RM600.
- Grew membership from about 260 to over 300 through two Clubs and Societies sessions.

Part-time Admin, Accounting and Front Desk Cashier | Tuition Centre | February 2023 - May 2023
- Handled administrative tasks, basic accounting and front-desk payments as a cashier.
